

Welcome to the Workshop!

Workshop Website

https://uw-madison-aci.github.io/2017-01-12-uwmadison/ Make sure you've completed the Setup!!

Etherpad (for collaborative notes)

http://pad.software-carpentry.org/2017-06-28-uwmadison-swc

Pre-Workshop Survey (1/2 of your entry fee!)

https://www.surveymonkey.com/r/swc_pre_workshop_v1

Check your setup!

Open Terminal or GitBash (Windows), and type the following:

python --version

Raise your hand if you DON'T have version 3.5.x (where x can vary).

python -c "import numpy"

Raise your hand if you get an error.

git --version

Raise your hand if you get an error.

nano --version

Raise your hand if you get an error.

Welcome to Software Carpentry! June 28-29, 2017

Instructors:

Carolyn Voter
Patrick Shriwise
Kalin Kiesling

Host:

Advanced Computing Initiative

What is 'Software Carpentry'??

- Non-profit, international organization
- Teaches workshops to help researchers adopt reproducible computational practices
- Instructors are all volunteers
- Materials developed by open science community
- Code-along learning model

Code of Conduct

- http://software-carpentry.org/conduct/
- Harassment includes offensive verbal comments related to gender, sexual orientation, disability, physical appearance, body size, race, religion, sexual images in public spaces, deliberate intimidation, stalking, following, harassing photography or recording, sustained disruption of talks or other events, inappropriate physical contact, and unwelcome sexual attention.
- All communication should be appropriate for a professional audience including people of many different backgrounds. Sexual language and imagery is not appropriate for any event.
- Be kind to others. Do not insult or put down other attendees.
- Behave professionally. Remember that harassment and sexist, racist, or exclusionary jokes are not appropriate.

Workshop Logistics: Where Stuff Is

Restrooms

Across the hall

Beverages

Drinking fountain: across the hall

Coffee/tea: front left corner of room, all day

Lunch

On your own.

Need a fridge? Let us know.

If You Can't Reproduce It, Is It Still Science? And how long will it take?

Inspired by Greg Wilson, Software Carpentry

Reality of Research Computing

- Many scientists spend most of their time developing, maintaining, or running software
 - Most don't consider themselves software engineers
 - Few have ever been taught how

So what?

 Most results take longer to produce than they need to

Difficult to assess quality

Software Carpentry to the Rescue

- Best practices used by the best software engineers whose business is development of quality software
 - They don't always have formal training
 - They don't always follow all the practices
 - Growing evidence supported by empirical studies

Software Carpentry Practices

- Write software for people, not computers
- Automate repetitive tasks
- Use the computer to record history
- Make incremental changes
- Use version control

- Don't repeat yourself
- Plan for mistakes
- First make it correct, then make it fast
- Document design & purpose, not just mechanics
- Conduct code reviews

Wilson et al. (2014) Best practices for scientific computing. PLoS Biology 12: e1001745

Good Enough Practices

- Data management saving both raw and intermediate
 forms, documenting all steps,
 creating tidy data amenable to
 analysis
- Software writing, organizing, and sharing scripts and programs used in an analysis
- Collaboration making it easy for existing and new collaborators to understand and contribute to a project

- Project organization organizing the digital artifacts of a project to ease discovery and understanding
- Tracking changes recording how various components of your project change over time
- Manuscripts writing manuscripts in a way that leaves an audit trail and minimizes manual merging of conflicts

Wilson et al. (2017) Good enough practices in scientific computing. PLoS Comput Biol 13(6): e1005510

Thoughts on Productivity and Automation

Thoughts on Productivity and Automation

HOW LONG CAN YOU WORK ON MAKING A ROUTINE TASK MORE EFFICIENT BEFORE YOU'RE SPENDING MORE TIME THAN YOU SAVE? (ACROSS FIVE YEARS)

http://bit.ly/motivate git)

Make Incremental Changes Redux

- Choose one practice
 - Implement it in your work
 - Share it with your lab group
 - Allow it to sink in
- Repeat

Where to Start?

- Depends on the nature of your work
- Consider the purpose:
 - Improve productivity
 - Improve quality
- Need help after the workshop?
 - Follow up meeting
 - Email our local Software Carpentry
 Community! @ swc-dc-help@lists.wisc.edu

Workshop Logistics: Continuous Feedback

Nametags

green side up – exercise completed red side up – exercise in progress; HELP! nametag down – all is okay

Post-Its

At each break, indicate something that was good and something that could be better.

Post-Workshop Survey (1/2 of your entry fee!) You'll receive a link from us after the workshop.

Welcome to the Workshop!
